Professional Summary

Self-taught Jr Full Stack student, highly motivated and oriented to achieve excellent results in the Web development sector, I'm interested in developing myself as a professional in the area and am looking for opportunities and experiences that allow to do so. have worked with technologies like HTML, CSS, SASS, JAVASCRIPT, PHP, PYTHON. Some of them are not strong but if the experience or the project requires it, knowledge in the area can be further strengthened.

Work History

2022-04 - Current

Front-End Developer

Independent, Santo Domingo

- Collaborated with stakeholders during development processes to confirm creative proposals and design best practices.
- Researched emerging web technologies and trends for possible incorporation into sites.
- Produced websites compatible with multiple browsers.
- Advised internal users on web service capabilities, principles and protocols.
- I develop and interpret personal projects using the latest front end development technologies today
